## FEATURES

Dairy-beverage merchandisers are designed to store beverage and dairy products.

### EXTERIOR

Front stainless steel finish. Vinyl coated metal sides. Top, back and bottom heavy gauge galvanized metal.

### INTERIOR

White powder coated aluminum walls and top. Stainless steel bottom.

### ADJUSTABLE SHELVING

Four rows of heavy-duty, wire display shelves. Adjustable in vertical increments of 1/2" (1.27cm).

### DOORS

Easy gliding plastic frame with aluminum facing, glazed with double pane sealed glass unit.

### LIGHTING

Brilliant shadow free illumination by side mounted fluorescent lamps. All full length fluorescent lamps are protected by safety shields against breakage.

### DRAIN

An electric evaporator pan is installed. No plumbing or drain connection is necessary.

### ELECTRICAL

Merchandiser operates on 115 V 60 Hz single phase. Simple plug-in installation.

### REFRIGERATION

All models are completely self-contained. Refrigerant R134A. Heavy duty air cooled commercial type condensing unit with a large ceiling hung forced air evaporator provides uniform temperature and humidity throughout the case. The temperature inside the case is controlled by a low-pressure control set between 34°F - 42°F.

### OPTIONAL

Stainless steel exterior; stainless steel interior; case width 24"; additional shelves
