

On-Counter

The Future Of Blending Is Here.

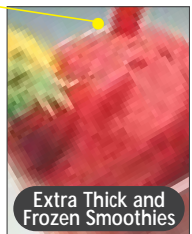

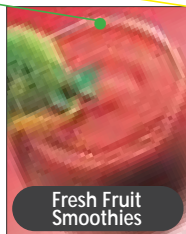

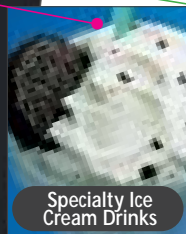

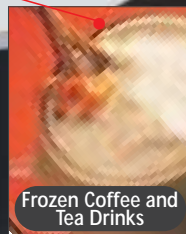

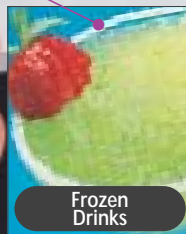

In-Counter

**Vita-Mix**[®]
FOODSERVICE

One Touch Operation

- Buttons one to six correspond to programmed electronic mixing techniques.
- Each program combines the right speed and timing to turn out perfectly blended, homogenized drinks with no ice particles.
- Count-down timer lets you see seconds remaining.
- Drinks are perfectly blended while you do other tasks.
- No need to stir a shave mixture.

Vita-Mix Blending Station® Specifications

- 2+ peak hp motor
- High Speed: 37,000 RPM bare motor speed
- Full range feedback controlled speeds from 1,500 RPM to 22,500 RPM
- 50/60 Hz, 11.2 amps
- Dimensions:

On-Counter Touch and Go Blending Station

Height of unit closed: 22" (56 cm)

Dimensions: 22" H (56 cm) x 9-1/4" W (23.5 cm) x 10-1/2" D (27 cm)

In-Counter Touch and Go Blending Station

Height of unit above counter: 17-1/2" (45 cm) closed

Depth of unit below counter: 5-2/3" (14.5 cm)

Dimensions: 24" total height (61 cm) x 9" W (23 cm) x 12-1/2" D (32 cm)

- Both In-Counter and On-Counter models are available with 48 oz. (1.5L) or 64 oz. (2L) containers. Your existing Vita-Mix containers will fit all Blending Stations.

Redesigned Sound Reduction Chambers

- Quieter than the sound level of normal conversation.
- Impact-resistant, hinged, molded clear polycarbonate cover removes completely for easy cleaning.

Advanced Engineering

- Display features resettable running-total drink counter.
- Built-in overheating protection.
- Count-down timer lets you see seconds remaining.

Variable Speed Operation

- Variable low or high pulse adds versatility to non-programmed blending.
- Use low pulse to stir and refresh drinks.
- Use high pulse to blend without puréeing or homogenizing.

Additional Features:

- Can be used as a variable speed blender.
- Displays percentage of power being used from 7-100%, as well as elapsed time.
- Remembers your last blending speed.
